

MONSTROUS NEW PANORAMA TERRAIN

WINTER 2017 / 2018 SEASON

Panorama Mountain Resort just got bigger. And better! And badder. This monstrous new terrain is where the wild things are. And it's definitely where the wild things will go! The new area boasts four huge new double black lines. Panorama now has 4,265 feet of vertical, an additional 128 acres of terrain and a new resort distance record for a ski run, at over 6.5 km long! This brand new alpine ski zone is now in-bounds and part of the resort's regular safety patrol. The first phase of this terrain expansion is available for skiers and riders at the start of this season.

Don't be afraid! Come check out where the wild things will go!

There's more to the mountains. **+**
